- Ship's Damage Inspection and Damage Repair Surveys
- Hatch Cover Watertight Integrity Tests (Ultrasonic) and Certification
- Hatch Sealing & Unsealing Survey
- Port Captains
- Draft and Bunker surveys / On-Off Hire Condition & Bunker surveys
- Towage Survey
- Warehouse Warranty Inspections

(warehouse, silo and shore tank inspections)

PRE-LOADING SURVEYS

The subject survey covers holds & hatch covers visual inspections, including hatch covers water tightness test by means of ultrasonic device, if required.

In our pre-loading condition survey, the emphasis is placed on the cargo worthiness of the vessel, which is the most important item in order to avoid any cargo damage. In addition, successful testing of the important cargo worthiness items is carried out prior to loading commencement (instead of visual inspection only). In case, defects are found, loading is not allowed to commence by our attending surveyor and the Master is advised to perform necessary repairs until which these repairs are checked and approved.

Inspection at cargo stockyard if appropriate, visual inspection of the cargo & storage conditions. Monitoring the whole course of cargo loading operation and establish the exact condition of the loaded cargo. Monitoring lashing / securing & dunnaging operations. During pre-loading survey, we apply silver nitrate test on the Cargo where/when necessary.

Assist the Master in clausuring Mate's Receipts & bills of lading reflecting the actual condition of the loaded cargoes. A detailed report is provided with the recommendations and supporting documents including photographs.

HEAVY-LOAD GUARDING, PROJECT CARGO WARRANTY SURVEYS

Our surveyors have expertise to carry out supervisions of project cargo during loading / discharging from/to vessels at port and to/from trucks at ports and warehouses. During the subject survey, we also inspect & check the conveniences of the lashing materials for the cargo & transportation means. Additionally, we monitor lashing / securing operations and give advices for the proper lashing/securing of the cargo. Finally, we can issue lashing approval certificate.

We regularly inform our principals regarding developments of the cargo operation during cargo operation and a detailed report is provided along with the supporting documents including photos.

PORT CAPTAINS

We provide Port Captain services for various Shipowners and operators for smooth loading and discharging operation.

PRE-PURCHASE AND VALUATION SURVEYS

We can conduct pre-purchase and valuation surveys on behalf of any concerned parties for all sizes and types of vessels.

Pre-purchase and valuation surveys include inspections of the vessel's structural and watertight integrity, system's installations, operational condition, as well as performance and safety equipment fire-fighting equipment together with documentation. Each item could be inspected thoroughly depending on the condition of ships and / or the request of a customer.

A detailed report is provided with the recommendations and supporting documents including photos.

CONDITION AND LOSS PREVENTION SURVEYS

We have considerable experience in conducting condition and loss prevention surveys for all size and type of vessels on account of insurers / principals as well as sailing/motor yachts. The vessels are inspected systematically in accordance with the aim of the survey, i.e. surveying & reporting style varies according to the requirements and necessities of the customers. A detailed report is provided with the recommendations and supporting documents including photos.

CONTAINER AND EQUIPMENT INSPECTIONS LASHING SURVEY & LASHING CERTIFICATE

We have considerable experience in conducting damage inspection of the containers. In addition, we are also capable to inspect the equipment of the container.

The surveys are conducted for to establish and to ascertain the nature, cause & extent of the damages, if any.

The principals are provided with a lashing certificate including the materials used during operation.

A detailed report is provided with the supporting documents including photos.

HATCH COVER ULTRASONIC WATERTIGHT TESTS AND CERTIFICATION

We perform watertight integrity inspections on dry / general cargo vessel's hatch covers with Ultrasonic Hatch Covers Test device together with a certificate.

The background image is a composite of two photographs. The top half shows a close-up, low-angle view of a port's infrastructure, featuring a large yellow gantry crane with multiple cables and pulleys. To the left, several blue and red shipping containers are stacked vertically. The bottom half of the image shows a wider view of a port area, with more shipping containers in various colors (blue, red, yellow) and several yellow gantry cranes in the distance under a clear blue sky.

CARGO & TRANSPORT DAMAGE CASUALTY & CLAIM INVESTIGATIONS

Each type of cargo has to be handled in a specific way and inside the containers the products can be damaged due to various reasons. SAMAR inspection is here to provide advice and guidance for all types of cargo handling.

Subject works are mostly done on behalf of any concerned parties.

Issuing of detailed damage report together with documents including photos, documents and photo file.

HATCH SEALING & UNSEALING SURVEY

To sealing or unsealing of all cargo holds, hatch covers and related accesses prior to discharging or after loading along with issuing of related certificates.

SHIP'S DAMAGE INSPECTION DAMAGE REPAIR SURVEYS

We offer damage surveys to evaluate any damages sustained by the hull, systems, or any part on the vessel. Our expert surveyors will come on board to report information on the probable causes of the damage, recommendations on repairs, and estimates for the costs for such work.

Typical types of damage surveys can be for collision, mechanical dysfunctions, sinking, grounding, fire, adverse weather etc.

What you get

- Preliminary report after the initial inspection
- Reported conditions of the damage
- Statements from owners, operators and witnesses
- Identification and description of the vessel and its condition
- Description of damages
- Opinion as to the cause of loss
- Review of repair estimates for reasonableness
- If no estimates, Preparation of a Damage Appraisal
- Pre-Loss and Post-Loss valuation of the vessel

A large container ship, labeled 'OOCL JAPAN', is docked at a port. The ship's deck is filled with numerous colorful shipping containers in shades of red, blue, green, and yellow. Several large blue gantry cranes are positioned along the dock, with their long jibs extending over the ship. The ship's hull is white with a red stripe at the bottom. The background shows a clear sky and the industrial infrastructure of the port.

DRAFT SURVEY BUNKER SURVEYS ON-OFF HIRE CONDITION & BUNKER SURVEYS

Our surveyors are capable to carry out condition and bunker surveys during delivery and re-delivery of the vessels.

To ascertain quantity of the cargoes to be loaded or discharged by draft surveys conducting by our competent surveyors.
To ascertain quantity of the bunkers (FO/DO) to be supplied by bunker surveys conducting by our competent surveyors.
We can also inspect the cargo holds and hatch covers prior to loading operation in order to determine the structural damages in cargo holds at the time of on hire and off hire.

Issuing of bunker survey report and detailed on / off hire condition report together with documents and representative photos.

TOWAGE SURVEY

We can conduct towage surveys on behalf of any concerned parties for any kind of vessel. This surveys are covering to inspect the validity of the necessary certificates of the towing boat and physically inspection of the towing equipment.

The principals are provided with a towage certificate along with the supporting documents and photo file.

WAREHOUSE WARRANTY INSPECTIONS

(Warehouse, silo and shore tank inspections)
Our surveyors can perform warehouse inspection in details in order to describe present condition of the warehouse or any shore facilities. The underwriters will be informed with a special survey form.

DRONE SERVICES

SAMAR Inspection team has come up with a unique way to carry out certain survey and/or inspection requirements using a drone. This drone utilization is a highly sophisticated, safe, efficient and cost-effective approach.

The many advantages of using a drone include:

- **Safety:** Inspectors remain a safe distance while getting a close-up camera view.
- **Prevention:** The relative low cost of drone inspections is prompting many companies to use them to do inspections more often to detect potential issues earlier and avoid expensive repairs.
- **Data:** The archivable data obtained by a drone provides a meticulous record of a major asset's condition over time.
- **Recompense:** Using a drone to assess the condition of a damaged or dysfunctional asset can speed up the payment of a liability insurance claim and reduce any related costly downtime.

OUR OFFICES

With a network of offices at major Turkish ports, our clients are always in safe hands and well-placed to be advised on their issues in Turkey. Our head office is based in Istanbul with branch offices being located at major Turkish port namely. Kocaeli, Sakarya, Izmir, Mersin and Iskenderun.

Istanbul Head Office
